CARBON HOUSING

# FRONT ACCESS CARBON

## *Made for AHU System Construction!*

With units sized at 24 x 24 and 12 x 24, the PURE-LINE Front Access Carbon is specifically intended for built-up applications. Structurally reinforced, these modules are designed for multiple stacking and butting to achieve most any desired capacity. Pre-punched alignment holes provide the necessary bolting access for easy installation. And with 90 lbs. of carbon or like adsorbent in every full size module, it's clearly a practical, economical solution for any new application or retrofit.

## *Maximum Exposure!*

The fully gasketed grid is quickly accessed by removable bolts to reveal a tiled "V" or accordion styled tray arrangement. Why so many tracks, so many 1" or 2" Carbon Trays? For surface area and exposure! This design provides for maximum exposure of carbon surface area, allowing for greater air penetration and diffusion. If you really have to get it out, this is your best solution!

# CARBON HOUSING

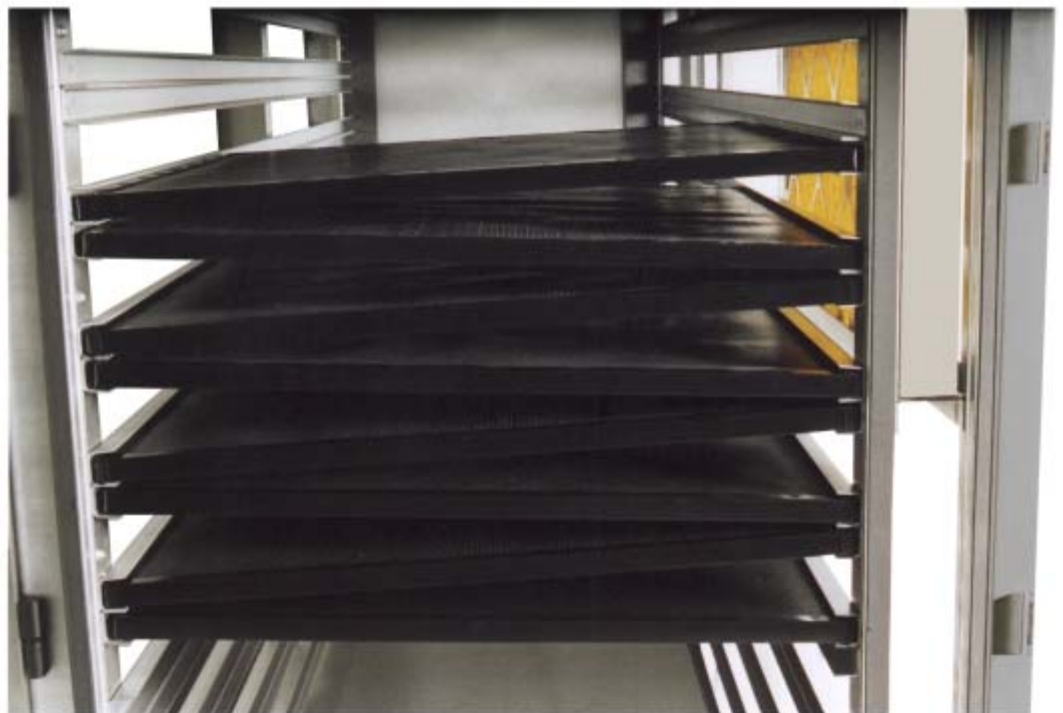

## *Don't Be Fooled!*

PURE-LINE Carbon Trays are manufactured in refillable, reusable 1" and 2" standard sizes. Available in Stainless Steel or Epoxy Coated, they house the actual adsorption/purification compounds. Activated Carbon, Potassium Permanganate and Activated Alumina, to list a few. One pound of these porous elements yields about 6 million square feet of surface area. Don't be fooled by filter gimmicks... Nothing works like carbon!

## *High Capacity Purification!*

That's right! So many filters! With either 1" or 2" tray or track arrangements available. And 2" or 4" prefilters for initial filtration or system dust, then 2" or 4" afterfilters for off dusting. It's clear why contractors, engineers and maintenance personnel love the Carbon Housing! Lift-off doors for easy access and easy service!

# Efficient Removal of Gas & Odors!

Adsorption and Purification, add Expertise, then Quality – and this clearly defines BLC's PURE-LINE of Air Purification Equipment. Our years of filtration experience and product reputation guarantee rugged, system specific equipment for gas adsorption and purification. Dependability, economy and customized multi-stage units provide engineers and contractors with practical solutions to the trickiest applications! Yes, BLC can do it!

## Options

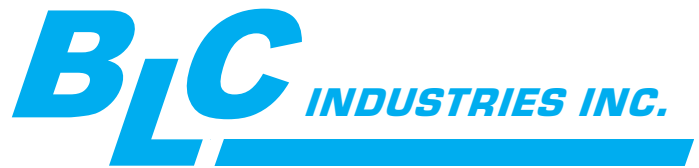

BLC offers more feature and construction options than anyone in the industry. These PURE-LINE selection options are readily available and add no additional time to deliveries:

- ☑ 1" OR 2" CARBON TRAY CAPACITY
- ☑ PRE & AFTERFILTERS IN 2" OR 4"
- ☑ WEATHERPROOFING
- ☑ DOUBLE WALL INSULATION
- ☑ HIGH PRESSURE
- ☑ FLANGE ADAPTERS
- ☑ LEGS/HANGER BRACKETS
- ☑ STATIC TAPS & GAGES
- ☑ STAINLESS STEEL

## One Year All Parts Warranty

BLC Industries assures the quality and performance of the PURE-LINE Series of Air Purification products by providing a 1 year All Parts Warranty. By guaranteeing the replacement of any failed component part for 1 year, BLC is stating for the record: We stand behind our equipment! We guarantee quality!

For Quality, Economy, Innovation and Service...  
It's always BLC!
