HVAC ACCESSORY EQUIPMENT

**Moisture
Separator**

CUSTOMIZATION!

This is one of several units built to engineer/contractor's specifications and shipped flatbed truck direct to site for immediate, crane installation. Coordinated "just in time" delivery, 1-touch installation, plus quality and economy. That's how BLC saves its customers costly labor, time and money on job sites!

Customized Built-Up Air Unit

- 30 Years of HVAC Filtration Experience
- 100% Factory Assembled
- Specialized and Critical Applications
- NEMA Controls also Explosion Proof
- 304 Stainless and Epoxy Coatings
- 3 & 4 Stage Filtration Systems
- Rugged, Durable Construction
- Quality and Economy
- "Just in Time" Deliveries

HEPA Built-Up Air Unit

An air-intake weatherhood, blower housing, HEPA Housing — all weatherproofed, epoxy coated, on rails. BLC's rugged, built up HEPA unit needs only contractor wiring and duct installation.

SPECIALIZATION!

Fixed Louver

Exterior walls, limited intake space, strict air flow requirements – BLC's Fixed Louver products will solve most application problems.

Weatherhood

With a 45 degree intake angle and an internally supported birdscreen to prevent unwanted debris, BLC's Weatherhood will keep it out!

Gages

With a wide range of gages — Manometers, dial-type Magnehelic and Photohelic — that are available along with installation kits, vent valves, pressure tips, signal flags and tubing, BLC can fit most any measuring requirement. Ask for factory mounted gage pricing!

HVAC EXPERTISE!

Mixing Box

Used most often to introduce or mix outside air with a return air, BLC's Mixing Box can also be used to retrofit a new or secondary air system with an existing system.

Air Diffuser

Reinforced, perforated panels with their predetermined series of holes provide structured diffusion for air leveling and restore equilibrium to a turbulent air flow.

Transition

BLC can transition most any line of our HVAC Filtration Equipment to your specifications. One unitary piece, the one you need, ready for installation!

- Rugged 14 or 16 Gauge
- Inlet & Outlet, Factory Assembled
- Square/Square or Square/Round
- 304 Stainless Steel
- Variety of Flanges Available

A DYNAMIC AND FLEXIBLE APPROACH!

Moisture Separator Cell

With over 2,500,000 individual intersects in the Separator Cell's aluminum (or stainless) screening materials, BLC's cell is 95% efficient for droplets of 10 microns and up.

Designed for applications where removal of excessive water, oil mist, fog or water-like fluent from an air stream is necessary, BLC's Moisture Separator is particularly useful in AHU systems where saturated air has condensed out, such as downstream of DX chilled water coils, steam or mist humidifiers.

In BLC's unit, moisture is captured and separated by cells, channeled into a vertical system and collected in the integrated drain pan where convenient field fittings take the moisture away.

- Rugged Steel Construction
- Vertical Drain System
- Lift-Off Access Doors
- Up to 3" W.G. Operating Pressure
- Extruded Aluminum Tracks
- Integrated Collection/Drain Pan
- Full and Half Size 4" Cells
- Practical and Economical
- 1/2" IPS Coupling(s) for Connection
- 100% Factory Assembled
- 304 Stainless Steel Available

BLC CAN DO IT!

Over 30 years of HVAC filtration experience coupled with extensive custom manufacturing for various filter and air handling/conditioning OEMs have produced a diversified series of equipment, HVAC accessories and system-based pieces that BLC has designated as its ACCESS-LINE.

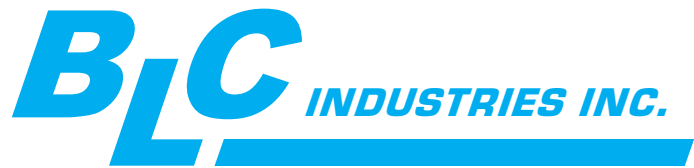

ACCESS-LINE provides products for both full HVAC system solutions and specific application solutions. Engineered 2 or 3 stage air fan units are examples of system solutions. Moisture separation and air diffusion are examples of the other. Both types of products embody BLC's commitment to absolute quality, economy, and practical installation and application.

BLC's products have always been manufactured with and for engineers and contractors. And we have always been more than strictly a catalog company. Our spirit of innovation runs parallel with our confidence to develop, prototype and manufacture new and timely products. This has taken us to different places working with many different people. But ultimately it has yielded a very open, accessible product offering. So as we say... BLC can do it! Let us know what we can do for you!

Quality and Service Assurance

BLC Industries assures the quality and performance of its ACCESS-LINE Series of Filtration products by adhering to a stringent absolute quality program and providing a 1 year All Parts Warranty for failed components where applicable. Let us state for the record: We stand behind our equipment! We guarantee quality!

For Quality, Economy, Innovation and Service... It's always BLC!
